

ABOUT US

Company milestones since 1996

World unique 4 technologies
under one roof

European leader of powder metallurgy

1996 →

First furnaces with a hydrogenated own-produced from hairdryer

First selfmade press

.....
New company **without any background**, wit no „mother company“
No opportunity to reject „crazy“ projects, it was the only chance to penetrate on the market.

1996 - 2000

Own tool shop

Own hardening shop

.....
Slower growth of the company, mainly on pilot series.

.....
Missing machines for big order realization because of bank unwillingness to finance investments and operations.

2001 - 2007

 **GEVORKYAN®**
POWDER METALLURGY PLANT
Your flexibility with our solutions

THANK YOU !!!

.....
Crisis has forced managers to look for supplier with alternative technologies as PM „Frozen“ projects have moved forward. Machine manufacturers had decline in sales and GEVORKYAN persuaded them to sell machines on supplier credit, purchase of new premises.

2008 - CRISIS

2009 →

HIP technology
(2015)

Automatization
and robotization
Department (2015)

- Financing the growth of the company by combination of bank and investor capital. We are the **first production company** in Slovakia whose development was financed by **bonds** and a **mezzanine loan**.
- Regular expansion of production capacities, introduction of new technologies (MIM, HIP and AM).

2009 - 2020

We became **the first foreign company** to subscribe shares on the START Stock market of the Prague Stock Exchange.

We received approx. **29 million €** from investors., which will be used to expand production and increase capacities in order to be able to **serve more clients faster**. This is the **largest issue** on the START Stock market of the Prague Stock Exchange by now.

2022

2010 →

Enlargement and growth of the company

100+ customers
30+ countries

Unique technologies

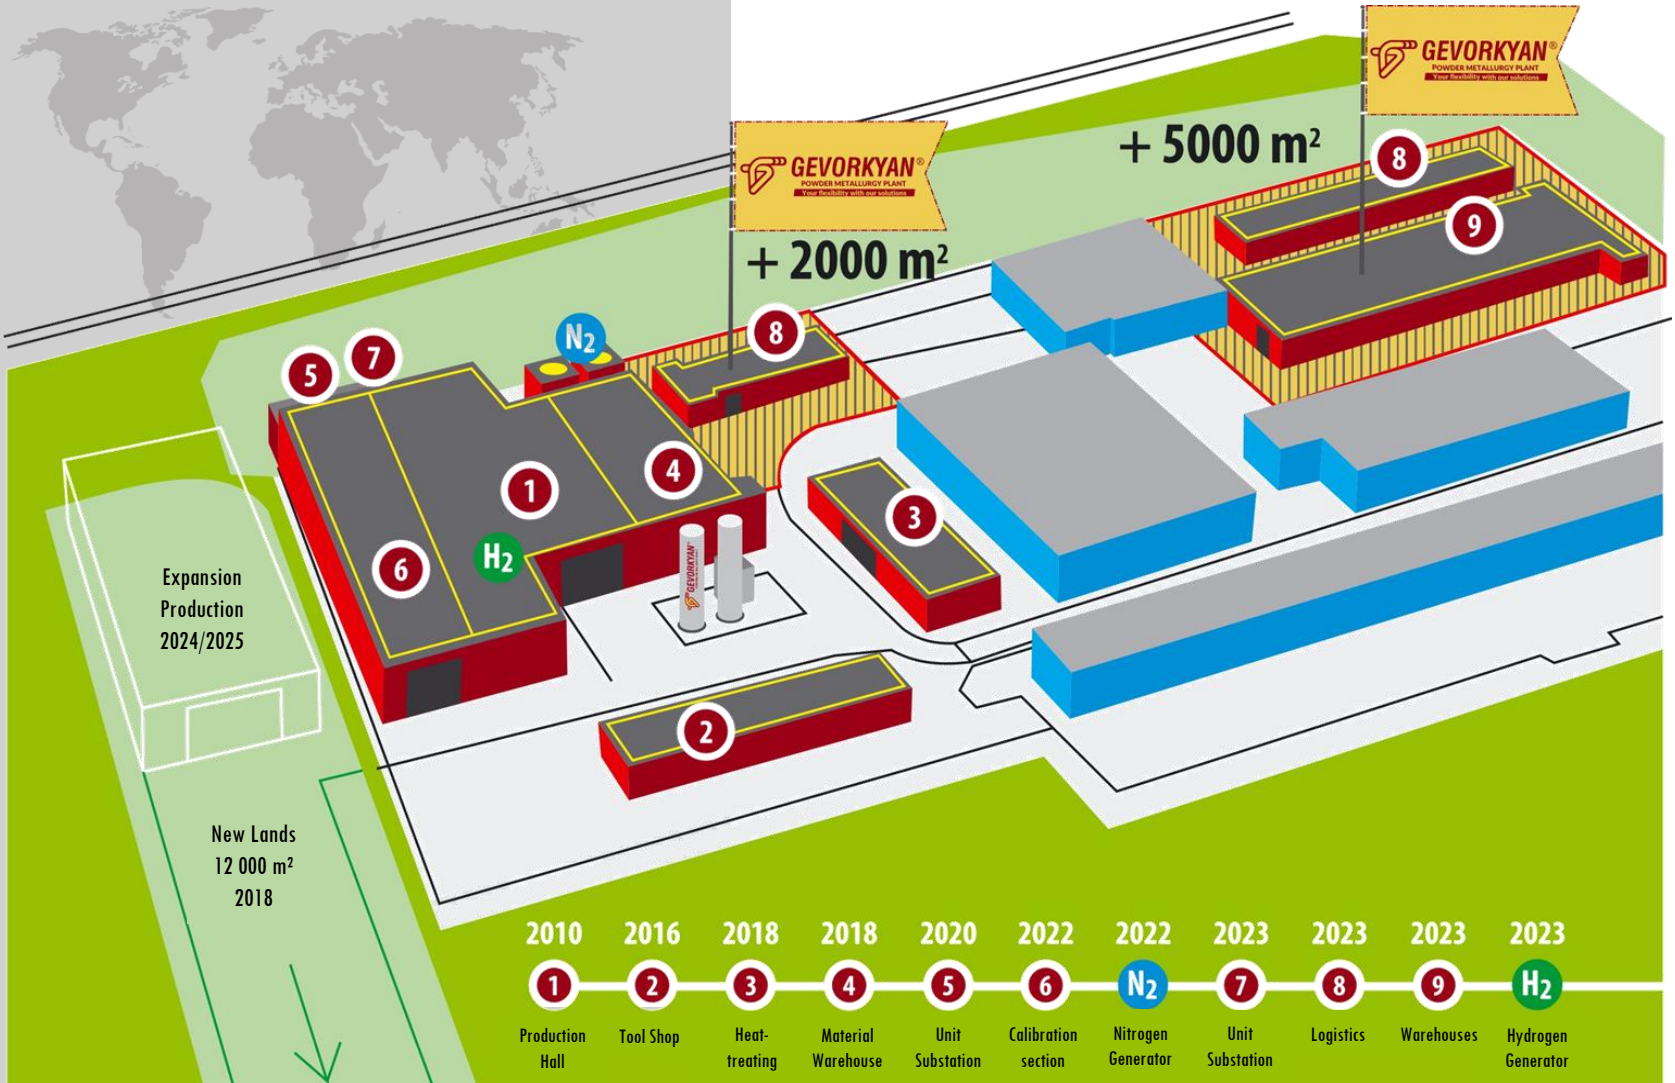

179 employees

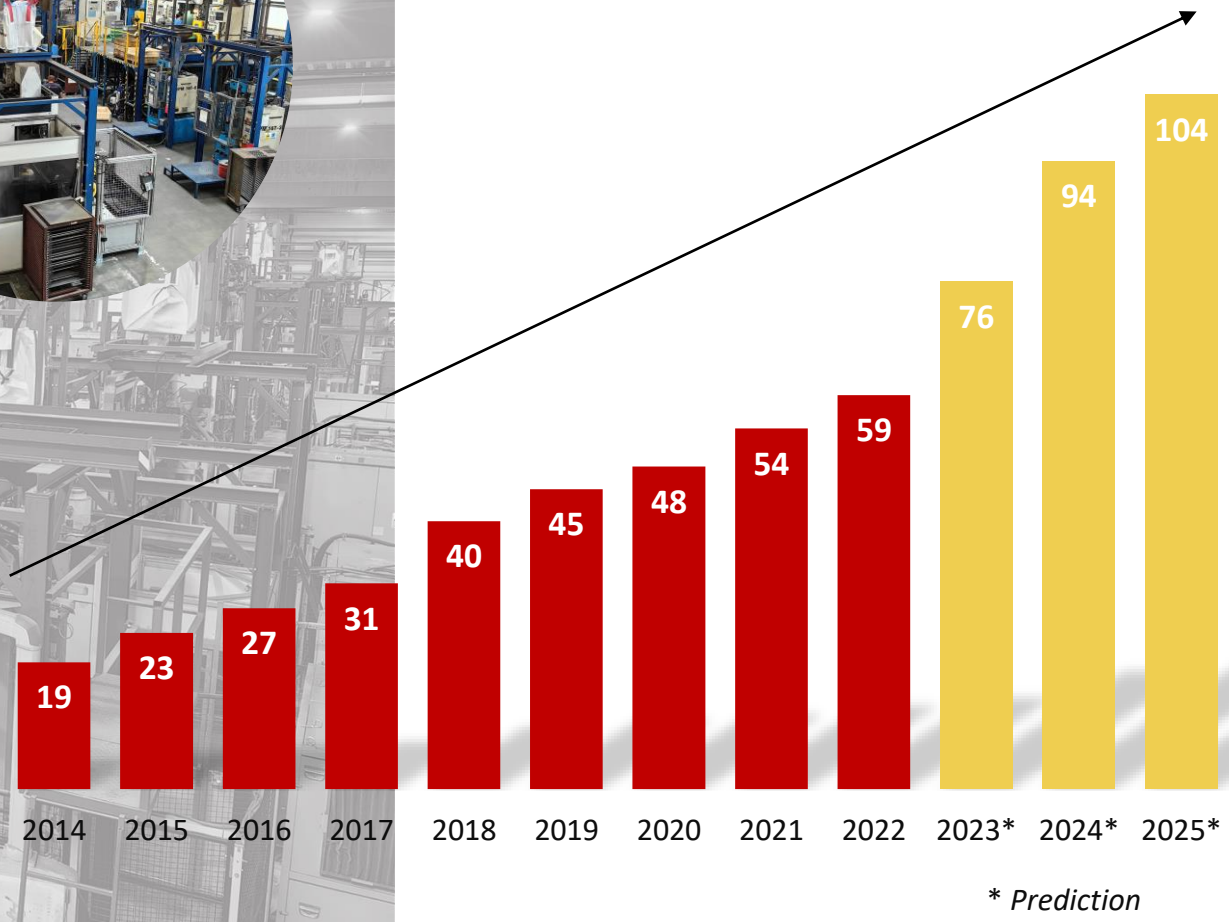

63 robots

revenues 58+mil. €
